

About **PEATSORB**

PEAT SORB was formed in 1989 with its roots based in Canada. Canada has 25% of the world's Sphagnum Peat Moss and the only Peat Moss that through a proprietary process can alter its DNA to absorb its relative the Hydrocarbon. PEAT SORB maintains its high regard in its own right by proving its abilities time and time again. We also have joint venture partners when the spill requires cutting edge machinery to offer in our product line. PEAT SORB specializes in producing a high performance absorbent remediator that is hydrophobic and now we also have an engineered Water Hydrocarbon Absorbent. All of PEAT SORB's Absorbents are environmentally, friendly solutions for a diverse range of industries that include; Oil & Gas, Energy, Mining and Industrial Manufacturers to name a few.
