

Natural & Sustainable

The key feature of PEAT SORB is its natural and sustainable composition, a renewable resource of Canadian origin.

The natural particle size and lightweight form make for excellent absorbent properties. It has a high porosity, allowing it to quickly soak up liquids and retain them within its cellular structure, permitting landfill disposal with its non-leaching characteristics. No secondary contamination can occur.

SAFE FOR ALL MARINE LIFE, ANIMALS, BIRDS, PLANTS,
CORAL REEFS, RARE VEGETATION,...ETC, ALL CAN BE
PRESERVED ECOLOGICALLY.
